Sheet 1: Introduction

Service Line Inventory Template for WA Small Public Water Systems

*Revised by Washington State Department of
Health September 2024*

What is the purpose of this template?
 The purpose of this template is to help small and medium sized water systems comply with the service line inventory requirements of EPA's Lead and Copper Rule Revisions (LCRR). The EPA 2022 Excel template was modified by Washington State Department of Health.

How is the template organized?

The worksheets in this template are color coded:
 Yellow sheets are instructions and background.
 Dark blue sheets are templates for systems.

The cells in this template are also color coded:
 Gray cells are background or instructions.
 Light blue cells are fillable cells for systems.
 Aqua cells are the required fields in the Detailed Inventory worksheet.

Template Organization

Worksheet Type	Worksheet Name	Description
Background	Template Instructions_System	Contains detailed instructions for systems.

	Classifying SLs	Summarizes requirements for classifying the entire service line when ownership is split (i.e., when the system owns a portion and the customer owns a portion).
Templates for Water Systems	PWS Information	For systems to document basic system information.
	Detailed Inventory	Provides the minimum data columns for water systems to use to track materials for each service line in their distribution system. Each row equals one service line connecting the water main to the customer's plumbing. Systems can customize the worksheet by adding or deleting columns.
	Public Accessibility Doc.	For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.

Sheet 2: *Classifying SLs*

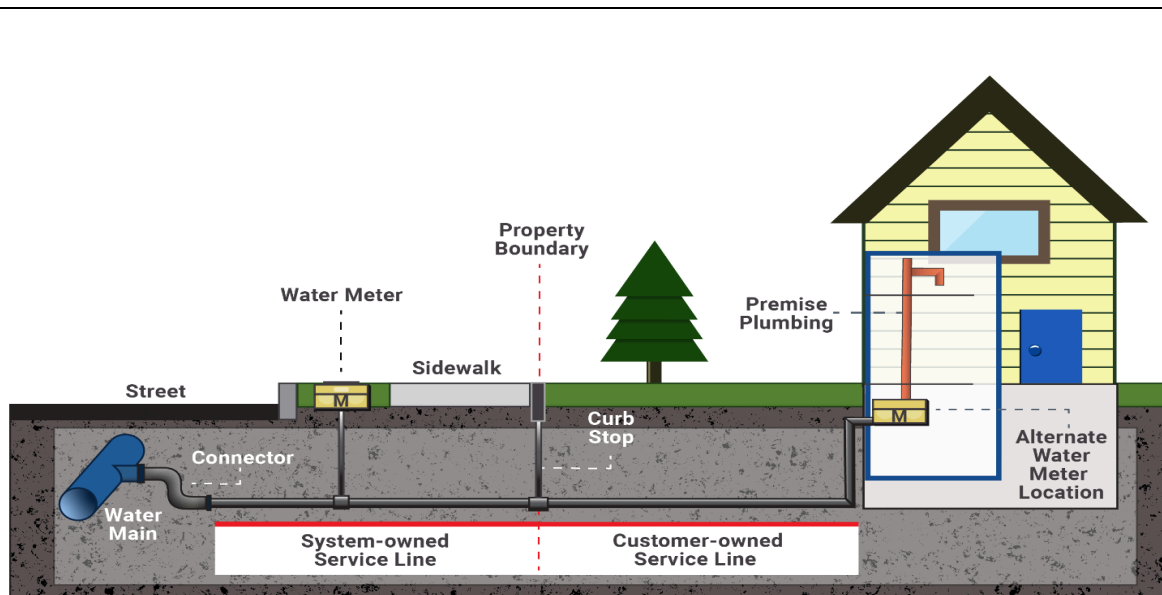

Classifying the Entire Service Line When Ownership Is Split

Purpose of this worksheet: To summarize EPA's requirements for classifying the entire service line when ownership is split.

Introduction

In many cases, service line ownership is split meaning that the system owns a portion and the customer owns a portion of the service line. Exhibit 1 below is a diagram of a possible division in service line ownership between the water system and customer. While the LCRR requires the inventory to categorize each service line or portions of the service line where ownership is split, a single classification per service line is also needed to support various LCRR requirements, such as lead service line replacement (LSLR), tap sampling, and risk mitigation. Table 1 below indicates how to classify the material for the entire service line when ownership is split between the water system and customer. For more information, see EPA's, Guidance for Developing and Maintaining a Service Line Inventory (2022).

Purpose of this worksheet: This is a modified version of EPA's template; modified to assist water systems with completing the minimum data elements needed for a lead service line inventory.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading and listed required need to be completed to meet the requirements of the LCRR. Important notes for each column are in

Row 12. Note that users can freeze panes to enable them to see the headings and notes when entering data. The worksheet is formatted for approximately 5,000 entries.

Sheet 5: Inventory Summary

Inventory Summary	
PWS Name: Crystal River Ranch	
PWSID:16480	
Enter Date Last Updated:	01/02/25

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Part 1. General Information

1. Is this the Initial Inventory or an Inventory Update?	Inventory Update
--	------------------

2. If you used a lead ban date to classify non-lead, what date did you use? Provide rationale if date used is prior to 1986.

3. Do you have lead goosenecks, pigtails or connectors in your system? No

Part 2. Inventory Summary Table 1

The below summary will help you when submitting your inventory to the state. The classifications listed in the "Detailed Inventory" tab Column K "Entire Service Line Material Classification" are used to calculate the total number of service lines for each of the four material classifications below. These are the totals for the four classifications for all service lines inventoried.

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	0
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	242
TOTAL		242

Notes

1 This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the Classifying SLs worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

2 A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.

Public Accessibility Documentation

PWS Name: CRYSTAL RIVER RANCH

Purpose of this worksheet: For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.

1. Select the location identifiers that you use for your service line inventory. Check all that apply.

- Address
- Street
- Block
- Intersection
- Landmark
- GPS Coordinates
- Other

If "Other", please describe:

PARCEL NUMBER EACH LOT

2. Does every service line have a location identifier?

Yes

If "No", explain. Remember that location identifiers are required for service lines that are lead and galvanized requiring replacement.

3. How are you making your inventory publicly accessible? Check all that apply. Remember that if your system serves > 50,000 people, you must provide the inventory online.
